

RAMADHANI BASITH RAZAKY

+62 819-1189-0465 | basithrazaky@gmail.com | linkedin.com/in/basithrazaky | github.com/basith-op | Jawa Tengah, Indonesia

Cybersecurity Engineering student (D4) at Politeknik Negeri Cilacap (GPA 3.79/4.00) with hands-on experience in both Blue Team and Red Team security operations, gained through a Security Analyst internship. Skilled in SIEM monitoring, log analysis, alert triage, web penetration testing, and data analysis with Python. Competent, curious, active learning, and quick to adapt — effective working independently and in team environments. Proficient in leveraging AI as a productivity tool.

PROFESSIONAL EXPERIENCE

Security Analyst Intern

Feb 2026 – Jun 2026

PT Teknologi Server Indonesia X-Code · Yogyakarta, Indonesia

Blue Team

- Monitored and analyzed security events and alerts using Wazuh SIEM
- Integrated and configured ModSecurity WAF for real-time web threat detection and system hardening
- Analyzed attack patterns from security logs and produced L1 incident analysis reports

Red Team

- Conducted web application penetration tests using Nmap, Nuclei, OWASP ZAP, and Burp Suite
- Produced penetration testing reports documenting vulnerability findings and remediation recommendations

PROJECTS

Docker-Based SOC for Web Attack Detection & Analysis

2026

Politeknik Negeri Cilacap · Role: Project Manager

- Building a SOC lab with Docker, integrating Wazuh 4.14.4 (SIEM), TheHive 5 (case management), Cortex + VirusTotal API (automated analysis), and DVWA as the attack target
- Simulating four attack scenarios: SQL Injection, XSS, Brute Force (Hydra), and PHP Webshell Upload
- Target metrics: Detection Rate $\geq 80\%$; aligned with NIST CSF 2.0 and OWASP Top 10 2021

Tech Store Sales Analysis

2026

Independent Project

- Analyzed synthetic or self-generated data of tech retail sales in 2024–2025 using Python (NumPy, Pandas, Matplotlib, Seaborn, scikit-learn)
- Extracted insights on total revenue, transactions, unique customers, top-performing categories, brands, and cities
- Identified revenue distribution patterns and peak sales seasons; applied supervised machine learning for predictive modeling

EDUCATION

D4 Cyber Security Engineering — GPA: 3.79 / 4.00

Aug 2023 – Nov 2027 (Expected)

Politeknik Negeri Cilacap · Cilacap, Jawa Tengah

SKILLS

Security Analysis: Wazuh SIEM, Log Analysis, Alert Monitoring & Triage, L1 Incident Reporting, System Hardening, ModSecurity WAF — Web Penetration Testing, Vulnerability Assessment, Burp Suite, Nmap, Nuclei, OWASP ZAP, Metasploit, Wireshark

Data Analysis: NumPy, Pandas, Matplotlib, Seaborn, scikit-learn, Data Cleaning & Processing, Visualization, Supervised ML

Other: Docker, Linux, PHP, Microsoft (Word, Excel, PowerPoint), Effective communication, AI Productivity Tools

Languages: Indonesian (Fluent), English (Intermediate)

CERTIFICATIONS

Junior Cyber Security

Jul 2025 – 2028

VSGA Digital Talent Scholarship

- Practiced penetration testing and security analysis using web case studies (testphp.vulnweb.com)

ORGANIZATIONAL EXPERIENCE

Vice Chairman

Aug 2024 – Jul 2025

Cyber Student Community PNC · Cilacap

- Lead community learning activities; active in both Blue Team (Linux, monitoring) and Red Team (web exploitation, Burp Suite) divisions

Data Division Member

Aug 2024 – Jul 2025

Programming Teknik Informatika Club PNC · Cilacap

- Assisted division head in developing weekly machine learning curriculum
- Studied machine learning fundamentals: Pandas, NumPy, and core Python programming
